The Madras Medical Mission

Our Vision

To be among the leading charitable medical institutions delivering quality health care ensuring equity and compassion for persons of all social and economic strata on sustainable model.

Our Mission

To provide world class health care in key specialties exploiting the cutting edge technology with medical and managerial expertise.

Genesis- The Madras Medical Mission

The Madras Medical Mission is an organization inspired by the missionary zeal of Bishop Zachariah Mar Dionysius, Metropolitan of the Madras Diocese of the Orthodox Church of India, strengthened by the devotion and commitment of the members of this Community at Chennai (erstwhile Madras city of Tamil Nadu) who promoted the registered society in 1982. It strives to participate in the healing ministry by seeking to foster an environment of caring, compassion and love that enables it to respond to patient needs in enviable ways. MMM has entered into the Silver Jubilee in the year 2007.

The mission's effort to establish an institution to engage in the Ministry of Healing resulted in setting up its first unit relating to cardiac care in June 1987 in the hired premises of another hospital in the Mecca of Health Care in India – Chennai. Within a short period, from this humble abode, The Madras Medical Mission moved in 1995 to its own premises at Mogappair, a residential suburb of Chennai city, an aesthetically designed eight storied building around lush green surroundings.

Under the patronage of Mother Theresa, this monumental edifice was inaugurated in the presence of luminaries. The Madras Medical Mission complex with 250 beds set amidst landscaped gardens that provide a serene and tranquil

environment with modern hi-tech and sophisticated infrastructure, state-of-the-art technology, very high standards of cleanliness and hygiene for quaternary care has won accolades from the international community. The hospital is linked with other centers with their telemedicine network to enable sending and receiving digital images, ensuring connectivity with leading institutions for second opinion/ referral services.

Units of The Madras Medical Mission

The Institute of Cardio-vascular Diseases, the forerunner has carved a niche for itself in the international arena for total cardiac care and for provision of world class treatment under one roof for its hi-tech care at affordable prices, was established in 1987. *The Institute of Reproductive Medicine & Women's Health* established in 1999, is a one stop health care provider for women from birth to end of life, *Institute of Liver and Digestive Diseases* was established in 2001. *The Kidney and Organ Transplantation* unit was established in the year 2006, is conceived and executed by a team of highly reputed, and dedicated medical experts with extensive training and experience from North America and Europe. MMM's exclusive centre of excellence in medical learning – *Pondicherry Institute of Medical Sciences (PIMS)*, with its medical college and hospital are functioning from 2001 and the College of Nursing at PIMS Pondicherry is functioning from 2004. *College of Health Sciences*, Chennai was established in the year 2006.

MMM COLLEGE OF NURSING in Chennai under “Madras Medical Mission” was started in August 2008 with a view of training professional nurses who will have the potential to deliver quality nursing care to individual, families and groups across their life span in wide variety of health care settings as well as to assume the role of a teacher, supervisor, manager and researcher in the clinical / public health setting.

The College has been formally sanctioned by Government of Tamilnadu (G.O.293 dated 11.08.2007). The college is affiliated to the Tamilnadu Dr. M.G.R. Medical University, Chennai and has been recognized by the Indian Nursing Council and by Tamilnadu Nurses and Midwives council. The college is located at Nolambur.

The College aims at preparing graduates to assume responsibility as Professional, Competent Nurses and Midwives in providing promotive, preventive, curative and rehabilitative services.

OBJECTIVES:

The graduate of the PBB.Sc. Nursing programme, will be able to,

1. Apply knowledge from physical, biological, behavioral sciences, medicine including alternative systems and nursing in providing nursing care to individuals, families and community.
2. Provide nursing care using critical thinking skill based on steps of nursing process and utilizes the latest trends and technology in providing health care.
3. Provide promotive, preventive and restorative health services in line with the national health policies and programme.
4. Practice within the framework of code of ethics and professional conduct and acceptable standards of practice within the legal boundaries.
5. Communicate effectively with individuals, groups and members of the health team and demonstrates skills in teaching to individuals and groups.
6. Demonstrate leadership and managerial skills and conduct need based research study in clinical / community health setting to improve the quality of care.
